

Scalability & Future Plan

Date	06 July 2026
Team ID	SWTID-2026-7907
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Supports Limited concurrent users	Performance may slow with many users	High
2	SQLite database is suitable only for small scale usage	Limited as scalability and storage	High
3	Limited AI features a no mobile application	Reduced user experience and accessibility	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Support small number of users	Deploy on cloud with load balancing and auto scaling
2	Data Storage	Rescue Elite Database	Migrate to MySQL/PostgreSQL or Firebase
3	Performance	Single Shaq Server	Use caching, API optimization and cloud deployment
4	Security	Basic login authentication	Add JWT authentication, OAuth login an encrypted Storage

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Personalised learning recommendations	Next 3 months	Better learning experience
Phase 2	Voice-based AI Assistant and speech recognition	Next 6 months	Hands-free learning
Phase 3	Mobile Android application	Next 9 months	Increased accessibility end users
Phase 4	Multi-language support and advanced analytics	Within one year	Wider reach and improved insights
