

## Solution Architecture

|                      |                                                     |
|----------------------|-----------------------------------------------------|
| <b>Date</b>          | 4 July 2026                                         |
| <b>Team ID</b>       | SWTID-2026-7907                                     |
| <b>Project Name</b>  | EduGenie – Google Gemini Powered Learning Assistant |
| <b>Maximum Marks</b> | 5 Marks                                             |

### Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

## Component Description Table

| Component Name     | Description / Role in Architecture                                                           | Technologies Used                  |
|--------------------|----------------------------------------------------------------------------------------------|------------------------------------|
| Presentation Layer | Student interface for asking questions, viewing explanations, quizzes, and progress.         | HTML, CSS, JavaScript              |
| API Gateway        | Handles requests and connects the frontend with backend services                             | FastAPI, REST API                  |
| Microservices      | Generates explanations, quizzes, summaries, and personalized learning paths using Gemini AI. | Python, FastAPI, Google Gemini API |
| Databases          | Stores user accounts, learning history, quizzes, and summaries.                              | MySQL                              |
