

Coding & Solution

Date	6 July 2026
Team ID	SWTID-2026-7907
Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Vyshnavi-2409
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI, Google Gemini API
Key Features Implemented	• User Authentication • AI Question Answering • Concept Explanation • Quiz Generation

	• Text Summarization • Personalized Learning Path • Google Gemini Integration
Pending / Incomplete Features	Voice Interaction (Future Enhancement), Learning Analytics Dashboard, Multi-language Support
Setup / Run Instructions	1. Install Python and required packages. 2. Configure Google Gemini API Key. 3. Run backend using FastAPI (uvicorn). 4. Open the application in a web browser. 5. Login and use EduGenie features.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The EduGenie project follows modular coding practices with reusable components and clean code structure. Google Gemini API is integrated for AI-powered learning features such as question answering, concept explanation, quiz generation, and text summarization. The application is scalable, maintainable, and designed for future enhancements like voice interaction and multilingual support.
